DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Claims 73-83 are canceled.

Election/Restrictions

This application is in condition for allowance except for the presence of claim 73-83 directed to species non-elected without traverse (in the response received on March 7, 2005, there is no traversal with respect to claims 73-83). Accordingly, claims 73-83 have been cancelled.

Claims 1-72 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 4-7, 9-12, 14-17, 19-22, 24-27, 29-32, 34-37, 39-42, 44-47, 49-52, 54-57, 59-62, 64-67, and 69-72, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claims 73-83, directed to the invention(s) found in one of the non-elected groups 1-16 and 18-39, and do not require all the limitations of an allowable product claim, and have **NOT** been rejoined.

Art Unit: 2622

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement between groups 1-39 as set forth in the Office action mailed on February 8, 2005 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-72 are allowed.

The following is an examiner's statement of reasons for allowance:

As for claim 1, the prior art does not teach or fairly suggest the use of an image pickup apparatus having an operation commanding circuit for outputting a timing and a plurality of modes for reading signals out of an image pickup section, wherein a signal processing circuit performs a first mode for interpolating pixel data in positions of said virtual pixels or positions of said photosensitive cells and generating three primary color data on the basis of a plurality of pixel data, which are produced by mixing pixel data, and in a second mode, interpolating three primary color image data in the positions of

said virtual pixels on the basis of all pixel data sequentially read out of said photosensitive cells, generating three primary color pixel data at the positions of said photosensitive cells on the basis of said pixel data given to said virtual pixels, and broadening a frequency band of said three primary color image data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
